

Bingo Addition (12-20)

I am learning to count on to find the total within 20.

Materials:

Bingo Boards filled with numerals 12-20, Bingo covers, double 10 frame cards 11 to 14 (several of each), numeral cube 1 to 6

Directions:

1. Each player should have a Bingo board (12-20) and covers.
2. Also get double 10 frame cards (11-14) and numeral cube 1-6.
3. Player 1 rolls the cube, draws a card and tells the total. All players cover the total.
4. Players take turns rolling the die, drawing a card and telling the total. Each time all players cover the total.
5. Players continue taking turns, the first player to have a Bingo wins.
