

Bead card addition (screened addends)

I am learning to tell the total within 30 by counting on.

Materials:

bead cards, Set A (15 to 26) and Set B (1 to 6)

Directions:

1. Shuffle Card Set A and place in a stack face-down. Do the same with Card Set B.
2. On your turn
 - Draw a card from Set A. Look at it briefly and then turn card face-down (or place it under a cover).
 - Draw a card from Set B. Look at it briefly and then turn card face-down (or place it under a cover).
 - Determine how many in all.
3. If directed by your teacher, also write a matching addition sentence.
