<u>Bull's Eye</u>

I am learning to find the total of two numbers within twenty with support, when one quantity is screened.

Materials:

-Dot Cards [1 to 10], -Partner Target Worksheet, -Writing instruments, -Optional twenty bead rack (ten wise) for support

Directions:

Set Up:

1. Each pair of students gets a Partner Target Worksheet.
2. Shuffle dot cards and place them in the middle of the group.

Game Play- On your turn:

1. Draw one dot card and place that card in the first dot card space on the worksheet.
2. Tell your partner the total number of dots on the card and write that number in the space on the worksheet.
3. Draw another dot cards and place it upside down on the second dot card space.
4. Tell your partner the total number of dots on the card and write that number in the space on the worksheet.
5. Find the total number of dots altogether and that number in the space on the worksheet.
6. Using the bead rack, find how far away from ten you are and write that number in the space on the worksheet.
7. Game will continue until each player has completed six turns.
