

Sorting Even and Odd

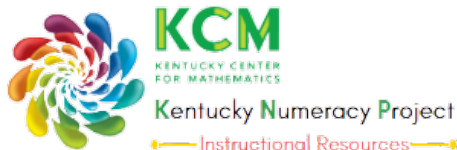

I am learning to build and sort (as even or odd) pairs of up to 20 snap cubes.

Materials:

snap cubes - 20, Even and Odd Chart

Directions:

1. Get 20 snap cubes.
2. Grab a handful of the cubes. Count them and make as many pairs as you can.
3. If you can make pairs with all of them, write the number under “even” on the Even and Odd Chart.
4. If you have one left over, write the number under “odd” on the Even and Odd Chart.
5. Put all the cubes back and grab a new handful of cubes.
