

## Equal Addends

I am learning to share an even number of up to 20 objects equally among two people. I am also learning to write the related addition sentence.

### Materials:

snap cubes - 20, writing space

### Directions:

1. Get 20 snap cubes.
2. Take 8 snap cubes and share the 8 snap cubes equally between 2 people.
3. Write the number sentence as “first group of cubes + second group of cubes = the total number of cubes.”
4. Find other numbers of cubes that can be shared equally between two people and write the addition for each.
