

## Making Rectangles

I am learning to tell the number of squares in a rectangle with only the row markers visible and the number in each row stated. I am also learning to write the number sentence that matches each rectangle.

### Materials:

Color Tiles - 24, cover, writing space

### Directions:

1. Get 24 color tiles, cover, and writing material.
2. Player 1 hides their eyes.
3. Player 2 builds a rectangle using color tile squares and covers all but the first piece in each row.
4. Player 2 tells the number of squares in each row.
5. Player 1 tells the number of tiles used and writes the multiplication sentence.
6. Players take turns and repeat.
