

Quick Images

I am learning to make equal groups and determine how many in all.

Materials:

Tree backgrounds (6), small bird pictures or other counters (36), dot die, writing surface

Directions:

1. Get tree backgrounds, bird pictures, dot die, writing material.
2. Roll the die. Place out that number of trees.
3. Roll the die again. Place that number of birds in each tree.
4. Tell how many birds there are in all.
5. Record the multiplication equation that matches.
