

Quick Images

I am learning to find the product when all items are screened and write the matching multiplication equation.

Materials:

Multiplicative quick images PowerPoint, writing surface

Directions:

1. Get images and writing material.
2. Player 1 takes one of the images and shows it for 3 seconds and then turns the image over to the white back.
3. Player 2 will tell how many dots or items in all.
4. Player 2 will write a matching multiplication equation.
5. Players can take turns showing the images.
