

Composite Cookie Company

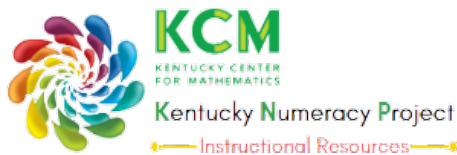

I am learning to equally share items into a given number of groups and find the total.

Materials:

cookies and plates cut-outs, task cards, recording sheet (many also use loose counters and paper plates instead of printables, if desired)

Directions:

1. Draw a card.
2. Use the cookies and plates cutouts to help you find the answer.
3. Record on your recording sheet and repeat until your sheet is full.
