

## Closest to 1000

I am learning to compare 3-digit numbers and write the comparison number sentence.

### Materials:

Place value dice (100s, 10s, 1s)

### Directions:

1. Player 1 will roll all 3 dice and write the 3-digit number.
2. Player 2 will roll the 3 dice again and write that 3-digit number to the right of player 1's number.
3. Fill in the comparison sign ( $<$ ,  $=$ ,  $>$ ).
4. The player with the greatest number (closest to 1000) wins the round.
5. After thirteen rounds, the winner is the player that won most of the rounds.
