

Delivery Game (without sticks and bundles)

I am learning to mentally add and subtract imagined quantities of sticks and bundles and explain my thinking.

Materials:

Delivery Game: 2 truck picture mats and numeral customer order cards, one set per pair of students; marker; writing space

Directions:

1. Give each player a Delivery Truck game board.
2. Each player will write "55" on his or her game board.
3. On your turn, draw a game card and follow the directions. Mark the change and explain how you know the new amount.
4. Take turns.
5. Play until all cards are gone. Player with the greatest number wins.
