

Fraction Squares - Build It! Draw It!

I am learning to build the whole or a given fraction using fraction squares when given the fractional part. Given the drawing of a fractional part, I am learning to draw the whole or a given fraction.

Materials:

EAI Fraction squares pieces (Blue, Brown, Yellow, Red, Orange and Pink layers - 1 set per student), Build It! Question Cards (sets A & B), 1 "Draw-it!" recording sheet per student

Directions:

1. Get the Fraction pieces and Set A Question Cards.
2. Player one draws a card and reads it to the other players.
3. Each player builds a possible whole. Compare work. Did all players build one whole the same way? What might be another to build one whole?
4. Continue, taking turns drawing a card, with all players building a whole.
5. After all cards in set A have been completed, each person completes one "Set A Draw-It!" sheet.

Repeat the process using Card Set B and the Set B Draw-It! Sheet.
