

Rods and Strips: What fraction part am I?

I am learning to name a fractional part, when using Cuisenaire Rods, given the part and the whole.

Materials:

Cuisenaire Rods, Activity sheet (1 per student)

Directions:

1. Get an activity sheet and a set of rods.
2. If the ORANGE Rod is your WHOLE, what is the fraction name of the Yellow Rod? How do you know? Does your answer agree with the example answer given on the activity sheet?
3. Repeat for each row, paying close attention to the size of the whole for every question.
