

Rods and Strips: How Long?

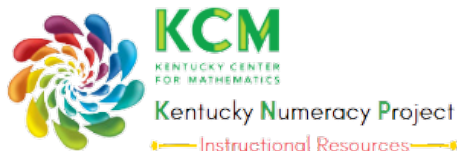

I am learning to determine the length of a rod when given the length for another rod.

Materials:

Cuisenaire Rods, Question and Answer cards - Sets A and B, "How Long? Activity sheet", 1 per student, colored pencils or crayons.

Directions:

1. Get the rods, Question cards (words) and Answer cards (numbers) (Set A only).
2. Students work together, using Cuisenaire rods, to match each of the Question cards to one Answer Card.
3. After all cards in set A have been completed, repeat using set B.
4. After completing set B, each person completes one "How Long?" Activity Sheet.
